SUMMARY

I am a Computer Science graduate and Software Engineer. I have been coding for the last 4 years. I have Full-stack experience working with an array of technologies such as Python, Java, JavaScript, and SQL.

WORK EXPERIENCE

Software Engineer Intern

December 2024 - March 2025

Hiver (**FlutterFlow**, **Figma**, **GitHub**, **Mobile App Development**)

- Improved app usability by 20% by developing and enhancing key features using **FlutterFlow**.
- Accelerated development timelines by 25% by managing codebases efficiently via **GitHub**.
- Enhanced app reliability by resolving critical bugs during testing, ensuring a seamless user experience.

Software Engineer Intern

September 2024 – December 2024

Olea Health (**React**, **Node.js**, **REST APIs**, **AWS**, **EC2**, **JavaScript**, **OpenAI**, **Firebase**, **Chart.js**, **NLP**)

- Created a SaaS AI ChatBot using **React**, **Next.js**, and **REST APIs** so users can learn about MPox and its symptoms. Users can also search for nearby medical facilities and hospitals.
- Created an **NLP algorithm** to analyze and visualize the spread of misinformation regarding MPox.

Software Engineering Fellow

July 2024 – September 2024

Headstarter AI (**React**, **Node.js**, **AWS**, **EC2**, **JavaScript**, **OpenAI**, **Firebase**, **Stripe**, **Clerk**)

- Developed 5 AI projects following agile methodologies resulting in 20% faster deployment cycles
- Created a SaaS product implementing **OpenAI's GPT Turbo API** that generates dynamic flashcards based on any topic. Integrated a paywall and pricing plans using the **Stripe API**, and user authentication and storage using **Clerk API** and **Firebase**. ([GitHub](#)) ([Product](#))
- Created a program that takes a file and upserts it to a **Pinecone** index integrated with the **Hugging Face API** via a RAG pipeline. Used **NLP** and embeddings to answer user queries. ([GitHub](#)) ([Product](#))

EDUCATION

Lewis University, Romeoville, IL

May 2024

Bachelor of Science in Computer Science

GPA: 3.8/4.0

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering, Operating Systems, Deep Learning, Programming Languages, Introduction to Unix, Assembly Language x86

PROJECTS

github.com/sufyan360

FindTune ([GitHub](#))

find-tune.vercel.app/

- Integrated the **Spotify API** with **speech integration** allowing users to search for songs by speaking lyrics or titles. The application displays the matching results with more than **95% accuracy**.

DownSupport ([GitHub](#))

down-support.vercel.app/

- Developed a chat bot using **Next.js** and **React**, paired with **OpenAI** to deliver responses tailored for mental health queries. Built the UI using **MUI** and **JavaScript** with **90% user satisfaction**.

Pantry Tracker ([GitHub](#))

pantry-tracker-silk.vercel.app/

- Redesigned a **Next.js** and **React** application to enable users to search, add, remove, and view items stored in **Firebase**. **Increased functionality and user satisfaction by more than 75%**.

Bite Finder ([GitHub](#))

- Engineered a web application using **Python**, **Google Maps API**, **Google Places API**, **HTML**, **CSS**, **JavaScript**, and **Flask** framework. This application recommends nearby restaurants based on selected cuisines. Users can view a list of restaurants and a map with their locations.

SKILLS

Proficiencies: Python | Java | SQL | JavaScript | HTML | MUI | CSS | Git | AWS | FlutterFlow

GitHub | Visual Studio Code | Postman | Firebase | Flask | React | Next.js | Vercel | REST APIs

Certifications: AWS Cloud Practitioner | Python Language Proficiency | Java Language Proficiency
